GUEST EDITORIAL

RICHARD A. HUMBER. Systematics and Invertebrate Pathology: A Trans-Kingdom Problem	1
--	---

GENERAL ARTICLES

BRIAN MORTON. The Occurrence of Inflammatory Granulomas in the Ctenidial Marsupium of <i>Corbicula fluminea</i> (Mollusca: Bivalvia): A Consequence of Larval Incubation	5
P. F. ENTWISTLE, P. H. W. ADAMS, AND H. F. EVANS. Epizootiology of a Nuclear-Polyhedrosis Virus in European Spruce Sawfly, <i>Gilpinia hercyniae</i> : Birds as Dispersal Agents of the Virus during Winter	15
E. C. MUSSEN AND B. FURGALA. Replication of Sacbrood Virus in Larval and Adult Honeybees, <i>Apis mellifera</i>	20
PAUL L. KRUPA, LARRY M. LEWIS, AND PETER DEL VECCHIO. <i>Schistosoma haematobium</i> in <i>Bulinus guernei</i> : Electron Microscopy of Hemocyte-Sporocyst Interactions	35
LAWRENCE A. LACEY AND MIR S. MULLA. Evaluation of <i>Bacillus thuringiensis</i> as a Biocide of Blackfly Larvae (Diptera: Simuliidae) ...	46
MARTHA GILLIAM, HOWARD L. MORTON, DOROTHY B. PREST, RICHARD D. MARTIN, AND L. J. WICKERHAM. The Mycoflora of Adult Worker Honeybees, <i>Apis mellifera</i> : Effects of 2,4,5-T and Caging of Bee Colonies	50
WILLIAM N. NORTON AND S. BRADLEIGH VINSON. Encapsulation of a Parasitoid Egg within Its Habitual Host: An Ultra-structural Investigation	55
D. G. BOUCIAS AND G. L. NORDIN. Interinstar Susceptibility of the Fall Webworm, <i>Hyphantria cunea</i> , to Its Nucleopolyhedrosis and Granulosis Viruses	68
TIMOTHY P. YOSHINO AND THOMAS C. CHENG. Aminopeptidase Activity in Hemolymph and Body Tissues of the Pulmonate Gastropod <i>Biomphalaria glabrata</i>	76
V. H. WHITLOCK. Effect of Larval Maturation on Mortality Induced by Nuclear Polyhedrosis and Granulosis Virus Infections of <i>Heliothis armigera</i>	80
ZDENĚK MRÁČEK. <i>Steinernema kraussei</i> , a Parasite of the Body Cavity of the Sawfly, <i>Cephaleia abietis</i> , in Czechoslovakia	87

NOTES

P. P. SIKOROWSKI AND J. H. LASHOMB. Effect of Sunlight on the Infectivity of <i>Nosema heliothidis</i> Spores Isolated from <i>Heliothis zea</i> ...	95
ALBERT H. UNDEEN AND RICHARD A. NOLAN. Ovarian Infection and Fungal Spore Oviposition in the Blackfly <i>Prosimulium mixtum</i>	97
J. B. CARTER AND M. L. LUFF. Rickettsia-like Organisms Infecting <i>Harpalus rufipes</i> (Coleoptera: Carabidae)	99
LOY E. VOLKMAN AND MAX D. SUMMERS. <i>Autographa californica</i> Nuclear Polyhedrosis Virus: Comparative Infectivity of the Occluded, Alkali-Liberated, and Nonoccluded Forms	102
MICHAEL C. MIX AND RONALD T. RILEY. A Pericardial Tumor in a Native (Olympia) Oyster, <i>Ostrea lurida</i> , from Yaquina Bay, Oregon	104
A. C. THOMPSON AND R. E. McLAUGHLIN. Comparison of the Lipids and Fatty Acids of <i>Mattesia grandis</i> and the Fat Body of the Host, <i>Anthonomus grandis</i>	108
THOMAS E. RINDERER AND KATHLEEN DELL ELLIOTT. Influence of Nosematosis on the Hoarding Behavior of the Honeybee	110
T. M. KOVAL AND W. F. HINK. Increased Polyhedra Production in an Insect Cell Line Following X-Irradiation	112
C. GARCIA AND C. M. IGNOFFO. Dislodgment of Conida on <i>Nomuraea rileyi</i> from Cadavers of Cabbage Looper, <i>Trichoplusia ni</i>	114
W. A. L. DAVID AND C. E. TAYLOR. The Effect of Sucrose Content of Diets on Susceptibility to Granulosis Virus Disease in <i>Pieris brassicae</i>	117
THOMAS C. CHENG AND KENNETH R. AULD. Hemocytes of the Pulmonate Gastropod <i>Biomphalaria glabrata</i>	119

AUTHOR INDEX FOR VOLUME 30	445
CUMULATIVE SUBJECT INDEX (Volumes 29-30)	447

INFORMATION FOR AUTHORS

The *Journal of Invertebrate Pathology* publishes articles and notes on all aspects or original research concerned with the nature and study of microbial and amicrobial diseases of invertebrates, the suppression of these diseases in beneficial invertebrates, their use in the control of invertebrate pests, and those phases of general invertebrate microbiology that may have some relation to disease in these animals. The *Journal* is particularly dedicated to the publication of contributions of a basic and fundamental nature, although it will accept suitable articles pertaining to the applications of invertebrate pathology. The Editor-in-Chief and members of the Editorial Board will examine contributions from any qualified worker in any country of the world. Articles will be published in English. **Manuscripts should be submitted in triplicate to the Editor-in-Chief, Thomas C. Cheng, Institute for Pathobiology, Chandler Lab, Building 17, Lehigh University, Bethlehem, Pennsylvania 18015.** Inquiries concerning subscriptions and business matters should be addressed to the Publishers. **Authors will be charged for articles comprising more than 8 printed pages, including illustrations and tables, at a rate of \$40.00 for each excess page.**

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in the *Journal of Invertebrate Pathology* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Form of Manuscript. Manuscripts should be typewritten, on good quality bond paper, with wide margins and double or triple spacing throughout. It is recommended that articles be subdivided into *Summary, Introduction, Material and Methods, Results, Discussion, Acknowledgments, and References*. The manuscript must begin with a Summary. Any reviewing of the literature should be restricted to closely pertinent papers. The typescript should be carefully checked for errors of content and English phraseology before it is submitted. Corrections in proofs in excess of 10% of the cost of composition of the original manuscript will be charged to authors. The manuscript should carry the name and address (including the zip code) of the person to whom proofs are to be sent, and a shortened version of the paper's title, not exceeding 45 letters and spaces in length, suitable for a running title. When reporting quantitative data, the author should include the number of individual observations, the arithmetic mean value, and the standard deviation (or the standard error of the mean). When reporting differences between means, the level of significance should be indicated.

A useful writing guide is the latest edition of the "Style Manual for Biological Journals" published by the American Institute of Biological Sciences. This Manual should also be used as a guide to most abbreviations employed. Proprietary substances and trade names must be accompanied (at the first mention) by the chemical name.

Figures and Tables. Figures should be numbered consecutively with Arabic numerals in order of mention in the text; each figure should have a descriptive legend. Legends should be typed together on a separate sheet, double-spaced. All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. This includes the lettering, which is reproduced as part of the photoengraving and is not set in type. Line drawings should be carefully drafted with black India ink on white drawing paper or blue drafting cloth, no larger than 8.5×11.5 inches overall (21×27.5 cm). The lettering should be large enough to allow a reduction of two-thirds off. High quality glossy prints are acceptable. **Xerox prints are not acceptable.** Tables and footnotes should be typed on separate pages, numbered consecutively with Arabic numbers, and collected at the end of the manuscript. All tables must have descriptive headings and should be understandable without reference to the text.

References. Names of the authors should be mentioned in the text, with the year of publication in parentheses. References should be listed alphabetically at the end of the paper according to the form used in a recent number of the *Journal*. The names of journals should be abbreviated according to the Chemical Abstracts' *Service Source Index* (1969 Edition). References to books should include: author's name, year of publication, title of book (editor of book, if any), edition (if other than first), number of pages, publisher, and place of publication. Examples:

SMITH, J. O., AND JONES M. A. 1968. The diseases of the house fly, *Musca domestica*, and other Diptera, *J. Invertebr. Pathol.*, **10**, 978-982.

DOE, J. Q. 1968. "The Diseases of Animals without Backbones," second edition, 678 pp. Academic Press, New York.

Nomenclature. Binomial Latin names should be used in accordance with International Rules of Nomenclature. The first time a binomial is used it should be fully spelled out. In papers largely *taxonomic in nature* the names (fully spelled out) of the authors of the scientific names should be used, otherwise the names of authors should be omitted.

Notes. Manuscripts for NOTES should be less than 500 words in length and contain not more than two illustrations or two small tables, or one of each. NOTES are intended to provide for the prompt publication of new experimental results. References should be kept at a minimum in the NOTES, and should be incorporated directly in the text as (A. B. Smith, *J. Entomol. Soc.* 19, 289–295, 1968) or A. B. Smith (*J. Entomol. Soc.* 19, 289–295, 1968).

Proof. Authors will receive two sets of galley and engraver's proof, with the original manuscript. Proof should be returned to the Journal Production Department, Academic Press, Inc., 111 Fifth Avenue, New York, N. Y. 10003.

Reprints. Fifty copies of each article are granted free of charge, and additional quantities may be purchased. Reprint order forms will be sent with galley proofs.
